

The_ or-_{po}em

By Susana Sulic

In this incompleteness of the world

There is only ~~{a}~~ the or-_{po}em

Little minus

A letter of a sweet spirit =

o o o o o

méga

just not powerful enough

!

To describe the arithmetic of

numbers &

natura

an ω -consistent

~~called~~ numerically segregative

OO OO OO OO

macro macro macro macro

(or **Omega - IN** consistent)?

Only a collection of sentences

And behaviours

that

does lead to a logical contradiction

(syntactically)

but also avoid proving .

!

Certain

infinite combinations

of sentences *axioms* that are

intuitively contrasting

(**U**p to the present,

there is not a pr **OO** f

of (a) contradiction)

Who can introduce

the **C**oncept

in the course of proving

the incompleteness theorem ?

... Of the ~~(or)~~-Po_**EM**

theory is a theory

th_e**or**_y = **th**_e**or** _{+y-X-Z...}

Religious Cardinal

Or

Ordinal legions

N **O** minal **-or-**

Cha **O** ticus

Numbers

Of Cha **O** s

The « Complex »

or EM

=

T

able

The topological Plate

Of my brain

(Hypotetically
