Homework & other relevant course info can be found on the course syllabus page: Yes No (circle one)

Please let me know your past Math courses:

Any (good or bad) experiences in any of the math classes you want me to be aware of (and possibly avoid).

What math classes are you taking along with this class?

Is this your first 2000-level Math class?

Have you written proofs before? How did you like it (or didn’t you)?

Are there students in this class with whom you would like to work with on homework?

Are there students in this class with whom you would not like to work with on homework?

Have you worked with LaTeX before? How did it go?

Any plans after graduation? Hopes for the course? Anything else you think I should know about you?
