Math 3230-001 Abstract Algebra I Fall 2020

Name: ___________________________ PeopleSoft ID: ____________

Preferred Name in conversation: ________________

Homework & other relevant course info can be found on the course homepage: Yes No (circle one)

Please let me know your past 3000-level or higher Math courses:

Any (good or bad) experiences in any of the math classes you want me to be aware of (and possibly avoid).

What math classes are you taking along with this class?

In which semester did you take Math 2710/2710W or Math 2142 (or equivalent course elsewhere)?

In which semester did you take Math 2210, Linear Algebra (or equivalent course elsewhere)?

How comfortable are you with proofs?

Are there students in this class with whom you would like to work with on homework?

Are there students in this class with whom you would not like to work with on homework?

How comfortable are you typesetting math in LaTeX: very, moderately, hardly at all, or not at all?

Any plans after graduation? Hopes for the course? Anything else you think I should know about you?
