

LISA LAJEUNESSE

Strong Mathematical Induction

There will always be joy and sorrow

In the beginning,
a mother bore a child in pain
yet felt the joy of birth
She watched children grow
only to cause one another sorrow

She bore both joy and sorrow

Suppose from the beginning,
we have always known joy and sorrow

Sorrow upon sorrow upon sorrow
carves a rift in the heart
the capacity for joy awakens
as joy pours deep within
Tomorrow there will be joy

The joys of yesterday
leave a trace of joy
yet sorrow seeps in
tomorrow we mourn
the passing of yesterday's joy

Thus, tomorrow brings joy and sorrow

By the Principle of Mathematical Induction,
all our days unto the end breed joy and sorrow
