

SARAH GLAZ

**Between the Lines**

*Look at the unknown!*

What is the ratio of free time  
to the homology left behind?

At the origin lies a circle  
in its fullness of youth.  
Now only an arc.

Is it worth the effort  
of excavating the little that remained?

*Have you taken into account  
all essential notions involved in the problem?*

*Note:* The lines in italics are from “How to Solve It” by George Pólya (Princeton University Press, 1945)

First appeared in the *Bridges 2020 Poetry Anthology, 2020*
